

# INDECISIVE DECISION

**Let Us Decide for You**

...TIRED

# CONCEPT

- Description

“Our web app was made to make the users life easier. We had a vision to take the stress of one more decision at the end of your day to be easier. Our app helps you make the crucial decision of “what are we going to watch tonight?” or “What am I supposed to read when I finish this book?” We created this web app to ease everyones brains at the end of the day by making the decision for you.

- Motivation for development?

-Our motivation for this app was a mutual agreement on our consistent problem that it seems we all come across. We knew when we discussed this that us four coding students weren't the exception when it comes to this issue. Therefore this created our motivation on what exactly we wanted to do with our web app that we would be developing. Making the lives of busy people with a lot on their minds easier by taking this struggle away.

- User story

- As an indecisive user

- I want to remove the stress of picking a form of entertainment at the end of my busy day

- So that I can easily wind down and enjoy my time without searching through countless streaming services google searches.

# PROCESS

- Technologies used: HTML, CSS, Bulma CSS framework, JavaScript, Google Books API, TMDB API
- Mara- Creative Director
- Charissa- Lead Developer
- Caleb- Writer and Editor
- Phil- TMDB API Integration
- Challenges- Scheduling, Bulma, APIs, GitHub(Merge), Footer
- Successes- Solid foundation, final touches, styling, API Integration

## Prepare for Relaxation

We Are Here to Help

Welcome to Indecisive Decisions, where we do the thinking for you! Get ready for stress to be free from your shoulders. It's simple, just take our six question quiz and we will do the deciding for you. You will receive a movie and a book recommendation based off of your feelings, and preferences. You can also go wild and choose the 'Surprise me' selection option which will randomly select and give you recommendations. Enjoy and relax,  
Thank you!

# DIRECTIONS FOR FUTURE DEVELOPMENT

Increase Options: Media type, Platform availability, Parental controls, Add 'dislike' buttons

Performance: No repeats of previous results, More precise results

Design: More dynamic results display (simple icons with title and image on cover, cut-off for info section, pop out of extended info with click)
